

A photograph of a factory interior showing a long row of large, cylindrical aluminum coils. The coils are arranged in a perspective that recedes into the distance. The factory has a high ceiling with blue structural beams and red overhead pipes. The lighting is bright, creating reflections on the metallic surfaces of the coils. A dark grey rectangular box is overlaid on the upper right portion of the image, containing the company name.

# ALUMINIUM FLAT ROLLED PRODUCTION

Deciding to produce the aluminium used in aluminium composite panels with global targets, Yalçınlar Aluminium laid the foundation of its new factory in Kirklareli Organized Industrial Zone in 2021, which will accommodate aluminium flat rolled product production processes. **The facility, which became operational in 2024 with 50.000 tons of flat rolled aluminium annual capacity, has become Turkey's 3rd plant producing coated aluminium.**
